

GF-NEO COLUMN

Our new GF-NEO Column. Ultra-light carbon power for every production.

Weighing only 15 kg with a slim 236 mm carbon fiber column, it lifts up to 30 kg with 800 mm travel. With an outstanding speed of 1 m/s – faster than comparable systems – it sets a new standard for dynamic camera movement.

Designed for maximum flexibility, the GF-NEO Column can be operated both overslung and underslung. It's driven by a powerful 48 V system for quiet, smooth, and reliable performance across film, broadcast, live events, and modern content creation.

DIAMETER
236 mm

MIN LENGTH
650 mm

MAX LENGTH
1400 mm

LIFT
800 mm

LIFT SPEED
1 m/s

WEIGHT
